Re: Ar-CADia

By the recommendation of Robobat Polska Sp. Z o.o., Ar-CADia Company (based in Odessa, Ukraine) was involved in the development of one of Autodesk software product based on AutoCAD platform, intended for designing and generation of steel structure drawings.

Development was related to creating 3D models of various steel structures with parameterization of objects and connections and automatic generation of drawings; the possibilities of creating 3D structures with the parameterization of objects and the automatic generation of customizable shop drawings and detailing as well as support of building information modeling (BIM).

The following technologies were used in developing this product: C++ and C# languages, ObjectARX (AutoCAD SDK) and selected 3D modeling technologies.

The development team has shown a high level of professional background, the ability to perform tasks timely and with due quality, flexibility and good communication skills.
