

**Computers are a
necessary part of
modern life**

Computers play an important role in the lives of most of us today, whether we realize it or not. Some people, however, are beginning to ask if we really need them. In my opinion, computers have become a necessary part of modern life.

In the first place the computers can save a lot of storage space. Storing information on computers' disks is one of the most efficient ways of keeping data. One computer disk can hold the same amount of information as several books.

**Furthermore,
computers save
everyone a lot of
valuable time. Any
information can
be found at the
touch of a button,
whereas searching
for it manually
takes much
longer.**

Therefore, our everyday lives are made easier - from going to the bank to doing the shopping. Using a computer, we can make purchases, prepare documents or just chat with friends.

Also, using the computer, we are able to carry out complicated mathematical calculations that are used by scientists to predict the weather, or research.

**All in all I
strongly believe
that computers
are useful tools.
They have
changed our
lives for the
better and there
is no reason why
we should not
make them work
for our
advantage.**
