

it's a PLANTS ROOM

We know all about plants

[READ MORE](#)

Indoor plants

Each bouquet is created with love and attention to detail so that you can give your loved ones unforgettable emotions.

It is important to make sure that the plant you purchase is non-toxic and does not pose a danger to cats or dogs. The term "poisonous plants" usually refers to species that produce a toxic sap that is usually found in the leaves for protection. However, we have to assure you that when we write,

Pots and planters

Give your home freshness and comfort with our indoor plants.

The vast majority of poisonous houseplants only show their toxic effects after consumption. If your pets are not interested in plants, you can safely grow toxic plants in pots
