Who am I?

Name: Andrii

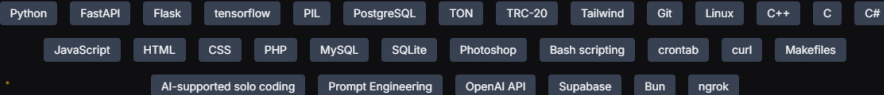

Age: 21

Alias: DUXA

I'm DUXA — creative dev mixing clean back-end logic with juicy visuals.

- Python / FastAPI backend magic
- Telegram & crypto-payments fan
- Dark-themed minimalist UI enthusiast

MY JOURNEY

First design gig & code "virus"

Created YouTube previews and avatars — my first real money through creative work. Also made a fake batch "virus" on Windows for fun. Started learning Python and C#. Built a simple Unity game.

2017

First coding client & web debut

Delivered a paid automation script — my first freelance coding job. Also built my first website to promote Instagram pages using Flask, HTML, CSS, and JS. Presented it at the Junior Academy of Sciences.

2018

Telegram bot era & language foundation

Wrote my first Alogram bot. It was very dumb, but surprisingly popular — called DRC.

Alongside Python, I started diving into low-level and web languages: C, C++, C# (which I had known before), and PHP.

2019

AI, voice & Nginx

Built a voice assistant to control lights and PC. Learned TensorFlow offline. Made a co-watching movie platform. First time configuring Nginx.

2020

Desktop app & performance tools

Made a full GUI in Python with CustomTkinter — disk cleaner and system booster. Used it as my college course project.

2021

Bot with machine learning

Wrote AURA, a Telegram bot using ML (not neural nets). Taught it to adapt to user behavior.

2022

Prototypes for fintech & streamers

Created a prototype for MonoBank integration. Also started a streaming tool. Didn't finish — rough personal year.

2023

Neural bot, Apple dreams & First business

Began learning Swift, but had no Apple gear. Made AURA 2.0 — a self-learning Telegram bot with a neural model. Too heavy for my PC. Launched my first business — an online programming school.

2024

Crypto service & Apple prep

Developing a TRC-20 crypto payment gateway. Planning to dive into Swift once I get a Mac & iPhone.

2025

DUXA portfolio goes live

Launched my portfolio site — bydusa. Dark-themed, minimal, and visually precise. Tailwind-powered with custom animations and interactive scripts.

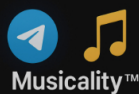

2025

Preparing for the Apple leap

Started saving up for a Mac and iPhone to fully dive into Swift development. Planning App Store deployment and mobile ecosystem expansion.

2025

PROJECTS

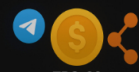

Musicality · Telegram MusicBot

Fast, minimal track search & download.
(NOT SPONSORED, DEVELOPMENT PAUSED.)

Telegram Auto-Shop

e-commerce bot · coming soon...

TRC-20 Crypto Payment System

Crypto Payment System

TRC-20 gateway · coming soon...

MY DREAMS

Create a profitable business

My goal is to build a business that not only sustains itself but also grows steadily, bringing value, innovation, and freedom.

Master Swift & iOS dev

Learning Swift and diving deep into iOS development is my passion. I want to craft beautiful, smooth apps — blending design and logic.

NOW

- Planning first monetized service
- Testing micro-bots & payment flows
- Updating photo archive
- Expanding portfolio with new drops
- Creating templates for future projects
- Streamlining client onboarding flow
- Experimenting with prompt engineering
- Documenting reusable code modules

FAQ

📦 Services and Experience

I develop bots, online schools and guides, automation tools, JavaScript and Python scripts (macOS, Linux, Windows), fintech integrations, media bots, and landing pages. I occasionally have ready-made templates. My experience covers all these areas.

🔥 Pricing and Payments

Pricing depends on project scope and deadlines. I offer hourly rates or fixed prices after discussing requirements. I accept small fixed tasks starting from one hour. I work via freelance marketplaces and direct requests. Payments are accepted in USDT (TRC-20) or via bank transfer. For new clients, a 30–50% upfront payment is required depending on complexity.

🔧 Project Workflow

Timelines vary from 3–4 days to up to 3 months depending on complexity. I can provide progress screenshots upon request. I guarantee clean, maintainable code following PEP-8 standards. Projects over \$500 include 7 days of free post-launch support.

💬 Communication and Consulting

I offer consulting at \$10 per hour. You can reach me via the general chat: <https://t.me/DUXAtasks>. I don't publish project showcases publicly but can share screenshots on request.

🔒 Security

I ensure security with HTTPS, regular backups, and Let's Encrypt SSL certificates for web-based projects.
