

Andriy Dmitriv

DEVOPS ENGINEER

Details

Stryiska
Lviv
0669281966
loki0ua@gmail.com

Skills

Cloud Platforms:
AWS/GCP/Azure

Databases: SQL

CI/CD & Automation:
Experienced with Jenkins, GitLab
CI/CD, GitHub Actions, Azure
DevOps, Bitbucket Pipelines, and
ArgoCD.

Networking: Strong knowledge
of networking protocols and
concepts: IP, TCP, NAT, UTP,
PPPoE, DHCP. VPN setup and
maintenance.

System Administration: Nginx,
Apache HTTP server, HAProxy,
Active Directory, OpenVPN,
PHP-FPM.

Development Skills: Backend:
Python, Django, Flask, FastAPI

Operations & Infrastructure:
Proficient in Docker, Ansible, and
Kubernetes (including Karpenter,
Helm, Istio, Filebeat). Skilled
in Infrastructure as Code (IaC)
using Terraform and Terragrunt
for AWS, GitLab, and Cloudflare.

Soft Skills:

Leadership: Ability to lead teams,
take initiative, and drive projects
to successful completion.

Mentoring: Experienced in
guiding junior engineers, sharing
knowledge, and supporting
professional growth.

Employment History

CTO, InfraJump

2024

Team Organization & Leadership:

- Led and organized the work of up to three DevOps teams, ensuring efficient collaboration and successful project execution.
- Established and implemented GitOps principles and Git flow methodologies to streamline development and deployment processes.
- Provided mentorship and guidance to team members, fostering their professional development and growth.

Infrastructure & Cloud Management:

- Designed and planned robust infrastructure solutions for complex projects, prioritizing scalability, reliability, and performance.
- Configured and managed multi-cloud environments across AWS, Azure and GCP, optimizing resource utilization and cost efficiency.
- Implemented and managed a centralized Terraform and Terragrunt system for streamlined infrastructure as code (IaC) management and automation.
- Set up and managed Kubernetes clusters, ensuring seamless deployment and operation of containerized applications.

CI/CD & Automation:

- Developed and maintained continuous integration and continuous delivery (CI/CD) pipelines to automate deployment processes and enhance development efficiency.

Startup & Innovation:

- Authored and served as the lead developer for a DevOps platform startup, driving its vision and technical execution.

DevOps Engineer, Playwing

DECEMBER 2022 – 2024

Main responsibility here is automation of the software delivery process:

Creating separate mono repo CI/CD pipelines with Jenkins (groovy).

- Dockerized builds for multiple projects in k8s.
- Configuration and administration of projects in Kubernetes (helm, karpenter cluster-autoscaler).
- Setting up infrastructure with Terraform in AWS
- Setting up the monitoring system Prometheus and Grafana
- Monitoring and correction of errors on already working projects

Also, I was setting up projects in various ECS, EKS, Beanstalk, and EC2 environments

DevOps Engineer, DesigningIT

MAY 2022 – DECEMBER 2022

Main responsibility here is automation of the software delivery process:

- Creating separate mono repo CI/CD pipelines with GitLabCI.
- Dockerized builds for multiple projects in EKS.
- Setting up infrastructure with Terraform in AWS
- Setting up the monitoring system Prometheus and Grafana

Communication: Strong interpersonal and cross-functional communication skills, both written and verbal.

Organizational Skills: Effective at planning, prioritizing, and managing multiple tasks in high-pressure environments.

Problem-Solving: Analytical thinking and proactive approach to identifying and resolving technical and process issues.

Knowledge Transfer: Passionate about sharing expertise through documentation, training, and coaching.

Proactivity: Self-driven, motivated to identify improvements and implement efficient solutions without waiting for instructions.

DevOps Engineer, Leo

FEBRUARY 2021 – MAY 2022

My main responsibility is automation of software delivery process:

- dockerizing builds for projects on different programming languages
- migrating manual deployment processes to fully automated CI/CD pipelines.
- writing automation scripts

Also, I set up Apache and Nginx web servers on Cloud.

System Administrator, RioTrans

APRIL 2019 – DECEMBER 2020

Setting up of Postfix (mail transfer client) in company with ongoing administration.

Built on-prem environment for company software support: ActiveDirectory, Postfix, 1C, DNS server.
