

## **Vidalista magic pills: treating erectile dysfunction no longer costs you a fortune!**

Millions of men in their 50-s and 60-s face issues with having a decent healthy sexual intercourse. This problem is more common than many might have thought it is. Therefore, humanity has tried to come up with a solution: a great number of men have tried Viagra at least once in their life. Right now we are presenting you a modern remedy that is cheaper than its predecessors but as much as effective – generic Vidalista pills!

### **What is Vidalista and how it actually works?**

Now you must be very curious about **what is Vidalista**, and we are here to tell you everything about it! Vidalista is a preparation aimed at helping people with erectile dysfunction. Its main component is Tadalafil, a synthetic substance that naturally stimulates blood flow to a male organ, therefore causing erection when a man is sexually stimulated, otherwise the drug simply won't have any desired impact on body. Active substances of our preparation are:

- Sildenafil (100 mg)
- Tadalafil (20 mg)
- Vardenafil (20 mg)
- Dapoxetine (60 mg)

Instruction will give you all the details, like for **how long** this preparation works. The answer is 72 hours of duration, which is definitely a record time among other drugs of same application. You also might wonder **when to take Vidalista** and **how much** in order to make it work fully. A man who wants to be sexually active at least once every 14 days should normally take a dose that contains 2.5 mg to 5 mg one hour before sexual intercourse regardless of mealtime. An allowable and recommended dose per day is 20 mg which is a single pill. One can also find a dosage of 40mg contained in one pilule. Exceeding an optimal dose of 20 mg per day can lead to occurrence of some unwanted side effects: increased sensitivity to light, headaches, nasal congestion, pain in back and legs, lightheadedness, color misalignment, rhinitis, eyelid edema. The most frequent of them are headache and dyspepsia (11 and 7% of cases). Afterwards the body adapts and discomfort ceases to bother. If no erection occurs for several hours, one should consult a doctor. The negative manifestations do not last longer than a few hours and do not require medical intervention.

Our pills are contraindicated for people with:

- hypersensitivity to components of the preparation
- chronic heart diseases such as angina, heart failure, recent myocardial infarction etc.

- uncontrolled blood pressure
- Severe cases of kidney and liver failure
- Retinitis pigmentosa, haemophilia

People suffering from kidney failure should take no more than 10 mg once every three days. For those who suffer from severe cases of liver failure the dosage should not exceed 10 mg; you should **use** it only every 48 hours. Women and children must not try this kind of medication.

## **Vidalista reviews: both positive and negative**

Men who face troubles with potency are offered a vast range of different preparations to treat erectile dysfunction, but, as many mention, the price differs greatly among numerous options. The **Vidalista price** has been repeatedly recognized by customers as the most affordable among other drugs of same kind. This very aspect has motivated most customers to write positive **Vidalista reviews**. Our medicament has been mentioned to cause erection incredibly quickly. Therefore we can say that this treatment is cheap and highly efficient. Our medication has been claimed by many to be more effective than Viagra, a drug of same application used worldwide as the most famous of its kind.

Incredibly efficient but still **cheap Vidalista** enables you to control ejaculation and duration of sexual intercourse. Eating healthy food and working out may also increase the effect as has been mentioned by some customers. Several men have complained about headache occurring after taking a pill, but it is said to go away quickly and cause not much trouble and discomfort. It is always a good idea to consult a doctor before turning to self-medication, even in regard with the potency treatment.

Given all that, positive aspects of taking our pills are:

- Lower price
- Rapid action of the drug
- Natural and harmless components
- Record duration of the drug

Negative aspects are:

- The remedy can cause minor side effect such as headache, eating disorder, dizziness

## **Generic Vidalista pills: who's behind the magic-pill thing?**

Our remedy is exactly analogous to Cialis pills, it has the same function and effect on man's body. There are only two differences between them: **cost of Vidalista** would be much lower than of Cialis; **generic Vidalista pills** are just a new name for the same

old product. It is produced by Centurion Laboratories which is an Indian corporation specializing in treating erectile dysfunction and premature ejaculation.

### **How to buy Vidalista online and why: the numerous privileges**

Nowadays heading for the nearest pharmacy in order to get a remedy is no longer the only option. You can order anything you want online, and our remedy is no exception for that. Anyone can **order Vidalista online** easily and quickly. Customers can frequently find **Vidalista for sale** within websites. It is also possible to get just one pill and make sure that preparation works for them before buying the whole pill packet; there may be also free trial coupons on offer, and you should definitely give them a go. Customers may take advantage of delivery services provided by suppliers of the preparation in a certain country, which is very convenient. Some websites provide discounts for regular customers who regularly **buy Vidalista online**, which is encouraging as well.

### **Vidalista price: what to expect when considering a purchase**

There are numerous websites selling the drug at a various cost, but usually that would be around 200-220 UAH for ten pills. One pill may be offered for 10-25 UAH. The more packages you buy, the cheaper it will cost you. For instance, some suppliers may sell 10 pills for 200 UAH, 20 pills for 360 UAH, and 100 pills for 1 200 UAH, lowering the price with the bigger dosage of the drug. But one can rest assured: **Vidalista price** is the most reasonable among its competitors in a given market.

In summary, our treatment is a highly efficient, cheap and harmless treatment for those who want to improve quality of their sexual life. Then why not give it a try and order a small pill package online?
