

# 1 Стратегический AI-консультант для бизнеса

**Задача:** получить структурированную AI-стратегию для компании.

Act as a senior AI transformation consultant with experience working with small and medium businesses.

Your task is to analyze the following business type:  
[insert business type]

Create a practical AI implementation strategy that includes:

1. 5 areas where AI can increase efficiency
2. Specific AI tools that can be used in each area
3. Estimated benefits (time saving, cost reduction, productivity)
4. Implementation difficulty level (easy / medium / advanced)

Requirements:

- give practical recommendations
- avoid generic advice
- structure the answer clearly
- provide examples of real use cases

## 2 Prompt для создания высококачественного AI-изображения

**Задача:** кинематографичное изображение для маркетинга или бренда.

Ultra realistic cinematic portrait of a modern entrepreneur working with AI technology.

Scene:

a stylish workspace with multiple screens showing futuristic AI interfaces,  
soft neon lights, modern minimalistic design.

Lighting:

dramatic cinematic lighting, soft shadows, warm highlights.

Camera:

85mm lens, shallow depth of field, ultra detailed photography.

Mood:

innovative, intelligent, futuristic.

Quality:

8k, hyper realistic, extremely detailed, professional photography.

Negative prompt:

extra fingers, distorted hands, blurry face, bad anatomy, low resolution.

### **3 Prompt для генерации AI-видео**

**Задача:** создать атмосферное короткое видео.

Create a cinematic 12-second video scene.

Scene:

a modern entrepreneur working late at night in a stylish office,  
multiple screens displaying AI dashboards and analytics.

Camera movement:

slow cinematic pan from behind the shoulder to the front.

Lighting:

dark environment with blue neon lights and screen glow.

Mood:

focused, futuristic, technological.

Style:

cinematic film quality, high realism, shallow depth of field,  
similar to a Netflix documentary scene.

## **4 Prompt для генерации экспертного контента**

**Задача:** создать профессиональный образовательный материал.

Act as an AI educator and content strategist.

Create a clear guide explaining:

"How beginners can start using AI tools to increase productivity".

Structure the guide as follows:

1. Introduction (why AI matters today)
2. 5 practical tools beginners should start with
3. Step-by-step example of using AI in daily work
4. Common mistakes beginners make
5. Final recommendations

Requirements:

- simple and practical language
- actionable advice
- examples of real scenarios
- avoid generic explanations

## 5 Prompt для автоматизации контента

**Задача:** создание системы генерации контента.

You are an AI content strategist.

Create a reusable content generation system for social media about AI tools.

Generate:

1. 20 content ideas
2. categorize them into:
  - educational
  - expert insights
  - engaging posts
  - promotional posts

For each idea include:

- headline
- short description
- suggested format (post, carousel, video)
- main message

Target audience:

entrepreneurs and freelancers interested in AI productivity tools.
