## Virtual events and online streaming

Ready-to-use decisions that you can trust. The organisation of webinars, conferences, master classes, corporate video meetings, business and educational events

## Use online streaming for enterprise communications and attracting customers

No hurry to cancel scheduled events - try to have them online!

A virtual environment without using decorations

Effective budget savings and smart use of space with a virtual studio. Depending on the idea you can use pop-up screens, live animation on any surface, camera flying on any trajectory, designing the on-air with interactive 3D animation.

## There are 80% of real meetings easily replaced by a videoconferencing session

During a VCS you can see your audience in real-time and have a complete conversation without any loss of meaning. Much better than a phone, Skype, and Zoom. Decision-making starts quickly, acting effectively, and cancel your business trips already today.

AV technology can be more than you can imagine

With professional sound equipment, the audience feels like they are in the same room with the speaker. The high-quality picture helps to hold the audience's attention and create top bloggers' and TV channels' picture.

By submitting this form you accept\_ the processing of personal data

 We can also film the broadcast using virtual studio technology. Special 3D collections of objects and scenes allow you to recreate the necessary location without the use of decorations.

Tracking accuracy of camera movement provides maximum matching of virtual space with physical

- Virtual decorations are many times less expensive than physical ones, and you can always edit them, change colours and textures. You can reproduce the interior of a well-known location or the exterior of any city. Also, we can use interactive elements, demonstrations and charts that the presenter will interact with, which will help to make the presentation even more interesting and engaging.
- one, full identity of real characters and graphical reproduction of background objects.
- Using a Virtual Studio, you can film full-fledged combined movies, clips, and high-quality promotions. For example:
