

## **Enterprise forms automation**

WorldAPP is the most engaging version for a better way to compile and connect data. One, easy to use business platform can help great companies run better. No need to buy new expensive equipment. No manual work. Everything is stored in the cloud. 24/7 access. All you need is one link, your personal password and you are already on a team. Assign as many permission levels as you need: admin, user, executor, distributor or multi-access. No matter if you are a PR agency promoting products, or an HR department creating employee profiles, or a Retail Company selling products online all over the world or Franchise developing your business network. You will be able to transform your field operations with a mobile solution that works both online and offline on any mobile device. The Form.com mobile app is available for IOS, Android, smart phones, and tablets and as a desktop application for Windows. It is the most sophisticated software for improving your processes with Forms Automation.

Forms automation is a worldwide computer system for dealing, invoicing and accomplishing paper-based forms, reviews, agreements, researches, contracts and other documents and pacts. The Form.com ensures constant improving and can help you be faster, more efficient and accountable. Make a step towards a paperless office. Create electronic forms customized to your business, and then connect your IT infrastructure for constant improvement. A fundamental achievement of the system is a capability to synchronize data with absolute security.

WorldAPP ensures services in all possible scopes, for example, inspections in retail, management or transportation fields. Also, improves the process of optimization in environmental and many others industries, as well as in the Government agencies. Companies like Sony, Intel, BNP Paribas, American Airlines, CNA, Unilever, TESCO, and others rely on the Form.com to accomplish the automation process. Also, a system helps to collect, integrate and optimize data, inspect and compile audits and form workflow. For more than a decade WorldAPP has been helping companies of all sizes with innovative technologies. It

is a global software company which provides organizations and companies with high-powered mobile data technology on the market. It helps to work with CRM systems. The versatile technology on the Form.com automates operations and resolves a solution that maps how you intend to distribute, access, complete forms across the enterprise and in the field. Every company still has business processes that are slowed down dramatically by complicated spreadsheets and endless mail attachments. Spreadsheets are hard to create, control and distribute. Things slowed down when internet connectivity isn't always available or manual work enhances the gap between systems. This is when WorldApp can help the most. You can establish forms and tasks with data from 3rd Party systems or use context in inspection profiles uploaded to the platform. After forms are created, you can assign them to individual users or groups completing forms with corresponding user information. Our team will help with each process from front to back end.
