

BEST AIR COOLERS – 2021

Hey buyers! Are you tired off carrying your habitual activities in this exhausting summer season, that too, by going out and are always surrounded by bad odour and sweat. Don't you think you need some sort of relaxation for yourself then? The best could be the cool air what I thinks.

If you think it's right, then DealsMarket is the right platform for you on which you could blindly trust and we'll surely provide you with; what you want – THE AIR COOLERS FOR YOUR HOME.

Though you will be helped by this machine a lot but as you know, a little bit of labor is required by you. It's just you need to

provide its substrate on which it may act upon to make you comfortable – Cool water.

Nowadays, air coolers are very much in demand. It's really a very helpful electronic device especially in summer. It just requires water on 2-3 days. It contains a very powerful and efficient features and cools the room very faster and for a longer time.

Conversely, a wrong choice makes your money invested in the wrong place. So, to help you buy the most suitable and nice product, we'll be providing you A LIST OF BEST AIR COOLERS. Simultaneously, we'll also enhance your knowledge of buying. Let's get started!

AIR COOLERS-

Air cooling is a method of dissipating heat. It works by expanding the surface area or increasing the flow of air over the object to be cooled, or both. An additional feature of the cooler is to add cooling fins to the surface of the object, either by making them integral or by attaching them tightly to the object's surface.

TOP 5 BEST AIR COOLERS – 2021

1. Symphony Jumbo 70 Desert Air Cooler (White)

Equipped with Bigger water tank capacity of 70 L, larger cooling pad area, and smooth air movement making it an ideal for cooling expansive areas. It is designed to be used for hot and dry weather conditions. Whether it is an expansive living space, medium-sized urban room or

an outdoor area, it is the best model to meet all kinds of cooling needs.

The air-coolers work best in the place that is properly ventilated. It is, therefore, important to keep the doors/windows open to experience effective cooling. The pump of the cooler works on dura-pump technology which ensures the long life of the pump.

KEY FEATURES-

- . Capacity: 70 L along with a Coverage Area; ideal for room size up to 119 cubic meters.
- . Cooling Media: Highly-effective aspen cooling pads and cool flow dispenser ensures superior cooling.

- Coming with Fan - Powerful fan with 3-speed motor and automatic vertical swing which ensures better air throw and whisper-quiet performance.
- Easy to use as the control panel has dial knob controls.
- Package Included: 1 unit air cooler and 1 unit trolley.
- Warranty: 1 year on manufacturing defects.

PRODUCT DETAILS-

- Model Number: Jumbo
- Item's Weight: 15 kg 500 g.
- Item's Dimensions: 63.4x65.5x129.5cm.
- Color: White
- Manufacturer: Symphony Limited
- Material: Plastic
- Wattage: 185 Watts

Pros	Cons
Has super budget cooler.	The trolleys cannot withstand huge load.

2. Symphony Touch Air Cooler (White)

Symphony's new launch is Touch 55 - a high-performance, next-generation air cooler for your cooling comfort. It is a premium innovation from the house of Symphony. With its stunning looks, powerful blower, and cool features, this

technological marvel will surely attract you to touch it.

KEY FEATURES-

- Equipped with I-Pure technology such as easily removable 4-side cooling pads, fully closable louvers, and a cool flow dispenser.
- It has a capacity of 55 L.
- The powerful double blower fan and specially designed grill of the cooler ensures better air throw.
- The air cooler for house comes with easy-to-use and user-friendly dial knob controls which ensure easy operation.
- Packages Included: 1 unit air cooler, 5 unit castor wheels and 1 unit pedestal.
- Warranty: 1 year on manufacturing defects.

PRODUCT DETAILS-

- . Model Number: Touch
- . Item's Weight: 18 kg 500 g.
- . Item's Dimensions: 43x76.5x97cm.
- . Color: White
- . Manufacturer: Symphony Limited
- . Material: Plastic
- . Wattage: 205 Watts

Pros	Cons
. Easy movement on the floor.	. Bad odor may evolve if water is not changed every day.
. Has a good filtering process for saturated particles.	

• Provided with authentic and modern blowers rather traditional fans.

3. Crompton Ozone Desert Air Cooler (White/Grey)

Keep yourselves cool and your electricity bills low with this Crompton desert air cooler. Energy-efficient and power

packed with some exciting features, this air cooler offers you optimum cooling performance. It features a Uniform Flow Dispenser, separate Ice Chamber and Motorized Louvers.

KEY FEATURES-

- Capacity: 75 L ideal for room size of up to 550 sq. ft.
- Provided with effective Honeycomb Cooling Pads and Air Speed control.
- Gives Air Delivery of 46000 km/hr; Air throw up to 52Ft; Number of Speeds: 3 and has a water level indicator.
- Works effectively in an area of CROSS-VENTILATION.
- Warranty: 1 year.
- Package Include: Air Cooler.

PRODUCT DETAILS-

- . Model Number: ACGC-DAC751
- . Item's Weight: 14 kg 500 g.
- . Item's Dimensions: 61x40.5x120cm.
- . Color: White/Grey.
- . Manufacturer: Crompton Greaves.
- . Material: Plastic
- . Wattage: 190 Watts.

Pros	Cons
. Nice and Durable.	. No water outlet.
. Provided with Ice Tray.	. Power Cord is short.
. Provided with Water Drainage Cock.	

4. Symphony Diet Cooler (Black & White)

Symphony Diet 3D is one of the best coolers to beat the heat during harsh and blistering summers. Diet 3D is a sleek, trendy, and powerful tower cooler that provides cool air

and is ergonomically designed to fit in the rooms with less carpet area.

Provided with an efficient 3D cooling experience, the cooler for home satisfies every cooling need. As compared to other air circulation systems, the room cooler offers 3-dimensional airflow, ensuring efficient and cool air circulation.

KEY FEATURES-

- Capacity: 55 L with an empty tank alarm.
Warranty: 1 year on manufacturing defects.
- Cooling Media: 3-side highly-effective honeycomb cooling pads and cool flow dispenser which ensures superior 3D cooling.
- Technology: Powered by I-pure technology with multistage air purification filters that deliver fresh and filtered cool air such as

allergy filter, bacteria filter, smell filter, PM 2.5 wash filter, and dust filter

- . Powerful Pump: The exclusive dura-pump of Diet 3D 55i+ ensures the longevity of the pump
- . Auto Shut-off: SMPS technology provides protection against voltage fluctuations
- . Control Panel: Easy to use & user-friendly auto pop-up touchscreen control panel
- . Package Includes: 1 unit air cooler, 4 unit castor wheels, 4 unit legs, 1 unit remote with batteries.
- . Warranty: 1 year on manufacturing defects.

PRODUCT DETAILS-

- . Model Number: Diet 3D – 55i+
- . Item's Weight: 10 kg 500 g.
- . Item's Dimensions: 39x45x134cm.
- . Color: White & Black.
- . Manufacturer: Symphony Limited.

- . Material: Plastic
- . Wattage: 145 Watts.

Pros	Cons
. Light Weight and stuff looking.	. Slightly overpriced than comparison.

5. Bajaj Platonic Air Cooler (White)

Bajaj Electricals offer air coolers are suitable for different climates and geographical locations. Equipped with

features like high air delivery and big water tank, the air coolers offer sustained and effective cooling.

Moreover, most Bajaj air coolers feature modern technology for an efficient cooling experience. All air coolers come with castor wheels, providing ease of movement.

KEY FEATURES-

- Capacity: 36 L ideal for room size of up to 150 Sq. Ft hence suitable for all climates and coastal regions.
- Honeycomb cooling media, easily removable pads; 3 Side cooling pad for enhanced performance.
- Castor wheel for easy mobility.
- Cord effective length 1.5.
- 3 way speed control; Quite Performance; Four way air deflection.

- . Package Include: 1 Cooler.

PRODUCT DETAILS-

- . Model Number: Px97 Torque.
- . Item's Weight: 11 kg 200 g.
- . Item's Dimensions: 45.5x43.5x82 cm.
- . Color: White.
- . Manufacturer: Tulika Appliances Pvt. Ltd.
- . Material: Plastic
- . Wattage: 100 Watts.

Pros	Cons
. Compact & Portable.	. Cooling speed remains same for all the air levels.

• Easy Mobility with help of castor wheels.	
• Gives nice cool air.	

FEATURES OF BEST AIR COOLERS

A good air cooler is key to make yourself relax. And a wrong product can make your money and time waste. So, all in the quest is to help you select the right air coolers for your home. Here are a few of the features listed-

- Sizes
- Turbo Cooling provided with Ice
- High Fan Speed
- Invertor option

- . Tower Air Cooler

BEST AIR COOLERS – FREQUENTLY ASKED QUESTIONS (FAQs)

1. How does an air cooler work?

Air cooler works by introducing moisture into the air and lowering its temperature. The air cooler takes in dry air, moistens it with water vapor, and releases cooled air into the room.

2. How is an air cooler different from a standard fan?

A standard ceiling fan rotates to increase circulation of air within a room so that the perspiration on your skin can evaporate more quickly.

Fans cannot operate in closed environments and in regions where air velocity exceeds 6.4 kilometers an hour.

3. Do air coolers require a lot of electricity to run?

Air cooling is the most energy-efficient cooling technology available.

Although the energy consumption of a ceiling fan and air cooler is similar, the cooling effect is considerably different. Air coolers can cover a larger area, actually cool the air, and work noiselessly.

4. Are air coolers effective in a humid environment?

Although air coolers work best in dry, arid conditions, they can still provide a cooling effect as long as the humidity is below the saturation point.

Air coolers may be less effective in moderately humid areas, but they can still provide ventilation and air circulation. However, air coolers are not recommended in areas with high relative humidity.

5. What kind of cooling pads do air coolers use?

Air coolers use innovative honeycomb and Aspen cooling pads. Honeycomb pads have a unique lattice structure that resembles a honeycomb. This medium provides a superior cooling effect due to the increased surface area for transfer of humidity in passing air.

6. What is multi-stage air purification?

Multistage air filtration system cleans a spectrum of airborne pollutants and harmful micro-organisms. The cool air passes through several filters before it is released into the room.

These filters can cleanse the air and water to provide a healthier indoor environment. Dust, microscopic pollution particles, bacteria, odors, and allergens are all filtered by this innovative system.

7. How do I identify the right model for my cooling needs?

These air coolers are designed to serve different needs and different spaces. Picking the perfect air cooler depends on several factors including the size

of your room, the local climate, the structure of your building, your budget, and the need for special features.
