

## Backup & Disaster Recovery Planning for Servers.

I provide comprehensive backup and disaster recovery solutions to ensure your critical server data is safe, recoverable, and well-documented. Protect your business against data loss and downtime with

professional planning and implementation.

Backup Strategies:

Design and implement reliable backup solutions using Veeam, FreeNAS, and QNAP.

Restore Testing:

Perform regular recovery testing to ensure backups are functional and data can be restored quickly.

Disaster Recovery (DR) Documentation:

Create clear, actionable DR plans for server recovery in case of failures.

Data Protection:

Implement replication and redundancy strategies to safeguard critical data.

Veeam Replication:

Configure Veeam replication for fast and reliable disaster recovery between servers or sites.

NAS Management:

Integrate FreeNAS and QNAP storage solutions into your backup and DR strategy.
