VIRTUAL DESIGN

Virtual Design is an accessible and affordable alternative to our traditional fullservice design. It allows my clients to see their creative vision come to life without paying for the additional services and project management that they can handle on their own. Virtual Design is primarily for clients (located near or far) who are seeking a designer's proffessional skills, but who prefer to implement the design on their own time.

Each project includes a design which will create a customized visualisation of your space. The designer considers your budget , goals, prefers and existing items that you own and love. This packet will provide you with information to decide if virtual design is right just for you.

ADVANTAGES

- *Cost-effective*

  Save on traditional designer fees while still receiving transformational home designs.

- *Convenient*

  Maximize your time by working with virtual design process creates the possibility to receive your all design in shorter times.

- *Personalized*

  Receive a custom design plan tailored aspeccialy to your style, needs and preferences.

WHAT DOES VIRTUAL DESIGN INCLUDE?

ORDERING

Once you receive your final virtual design, ordering items
is very simple. I will provide you with a direct link to each item,
so that you can purchase every thing online. All of the items
I source are through traditional retailers. I specifically do this
to make shopping easier for you.
