Profile

I began my career as a quality engineer in 2006 in the field of mechanical engineering, testing and researching electrical, hydraulic and pneumatic units and mechanisms, have been working as a Software QA engineer for the last two years.

Responsibilities on the projects:

- Manual functional testing
- Regression Testing
- Updating already written documentation (test-case, bug-report) and creating new documentation.
- Testing API (Postman, SoapUI)
- Database testing (select and joins only)
- Mobile testing (Android Studio, BrowserStack)
- Automated testing(Selenium IDE, Selenium webdriver)
