

How to Buy Bitcoin with Credit Card?

Bitcoin purchase can be an embarrassing and time-consuming process, especially for beginners. It may take much effort to select the best offer from the wide choice of exchange services, providing different fees and prices, as well as terms and conditions.

Trustee eliminates this inconvenience and saves your time and money. *Buy Bitcoin with credit card* in less than a minute with our smart and profitable app.

- Initially, download Trustee from Google Play or AppStore.
- Running the app for the very first time, take a note of your personal mnemonic key; you may need it to recover access to your wallet.
- In the bottom of the home screen find the “Swap” tab and click on it.
- Set up the fiat currency (EUR, USD, etc.) and define BTC as a crypto to receive.
- Choose your credit card as a Payway.
- Enter the required amount of the fiat currency to be exchanged.
- Add your credit card data and tap the “Search best offer” button.
- Trustee will automatically find the optimum exchange rate.
- Tap the “Accept and Pay” button to complete the swap and *buy BTC with credit card*.

Where is the Best Place to Buy Bitcoin with Credit Card?

Purchase crypto smartly and profitably with the Trustee Wallet App. Due to the intuitive user-oriented design and lowest fees possible, it is the *best place to buy Bitcoin*. Requiring no verification, as well as any personal data, our smart application provides an opportunity to purchase, share, receive and sell crypto remaining anonymous. Also, being a multicurrency wallet, Trustee supports numerous coins and tokens besides BTC.

While searching for the *best place to buy bitcoin with credit or debit card*, safety issues should be considered, too. As for Trustee, it is perfectly protected against unauthorized access. The only way to receive access to your funds is to enter a unique mnemonic phrase. Thus, unless the user discloses it, the asset and banking data are 100% safe.

Trustee makes Bitcoin purchase fast, simple and available all around the world. The application supports both Visa and MasterCard, regardless of the country or bank of issue.

What is a Bitcoin Wallet App?

Unlike physical wallets, *Bitcoin Wallet app* stores not the cryptocurrency itself, but the paired cryptographic key set. These keys let the user access the blockchain and provide control over the crypto asset associated with a certain address. Thus, such a digital wallet is vital for storing and managing your crypto funds.

To date, crypto wallets can be either software or devices. The least convenient (and the safest) are cold hardware wallets. They are used to store your access key offline, which makes it invulnerable to cyber attacks.

Web wallets are more convenient but extremely unsafe. Using such a wallet is undesirable because the cryptographic keys are kept by the third party and can be relatively a soft target for hackers.

Mobile Bitcoin Wallet by Trustee is the perfect choice to keep your keys both safe and accessible to use on a daily basis. Download our smart application to manage Bitcoin 24/7 wherever you are.

What is the Best Bitcoin Wallet App?

Trustee is not the only application to manage your crypto from a smartphone. So, let's have a closer look and find out why it is said to be the *best Bitcoin Wallet for Android and iOS*.

1. Multiple currencies supported.

Though Bitcoin is one of the first cryptocurrencies and has the largest market cap, there are many other cryptocurrencies worth your attention. Trustee makes it simple to operate as many coin types as you need from a single device.

2. Fast and safe transactions at any time.

Enjoy prompt transactions with Trustee! Whether you transfer, purchase or sell crypto, it takes just a few minutes to proceed the operation.

3. User-oriented design

Being functional, Trustee remains easy-to-comprehend, which makes it the *best Bitcoin Wallet* for beginners. Intuitive navigation simplifies the use of the app. Nevertheless, our customer support is ready to answer your questions 24/7.

4. Anonymity

Unlike other wallets, Trustee provides its numerous services without any registration needed. Therefore, you can remain 100% anonymous which is one more perk to the security of your funds.

5. Exchange rate tracker integrated

To save your time and money, Trustee will automatically search for the best exchange rate any time you carry out the transaction. Though the recommended provider is the most beneficial one, you can always change it manually if needed.

How to Create Bitcoin Wallet?

Different wallet types require various actions to *create Bitcoin Wallet*. However, installation of Trustee Wallet is the fastest and easiest way to start your new safe and anonymous crypto storage. Simply download it from App Store or Google Play and run the app. After a one-click confirmation, Trustee will generate a mnemonic phrase consisting of 12 words. It is vital to memorize or write it down. This combination will help you to restore access to the wallet in case your current device is lost or broken. All possible measures should be taken to ensure that the recovery phrase is kept safe.

To improve security of your funds you can create an additional pin-code, protecting the app from unauthorized access.

After that, your wallet is ready to use. Store, receive, purchase and swap your crypto swiftly and safely with the Trustee Wallet. Also, it's possible to earn extra coins by recommending the application to your friends.

How Buy Bitcoin on BTC Wallet?

Besides the opportunity to *buy Bitcoin* via Visa or MasterCard, Trustee provides other purchasing options. For example, you can exchange any other cryptocurrency to BTC if the corresponding currency pair is available. Here is a short manual on how to perform this transaction:

1. Run Trustee *BTC Wallet*;
2. In the bottom of the main screen, choose the icon labeled "Swap";
3. Define the asset to be exchanged;
4. Set up BTC as a currency to receive instead;
5. If the needed currency pair is available, enter the amount;
6. Tap the "Search best offer" button;
7. Accept the recommended provider or click on the "Other providers" button to change it;
8. Confirm the transaction;
9. Expect BTC in your wallet.
