

Stanford University

MAKING THE FUTURE

Presentation by :
Lysenko Zakharii

A wide-angle photograph of the Stanford University Main Quad. The central focus is the Main Quad building, a large, historic stone structure with a prominent red-tiled roof and multiple arched windows. The building is flanked by palm trees and other greenery. In the foreground, a large, well-maintained green lawn stretches across the frame, with several paved walkways. A few people are visible on the lawn, including one person in a bright yellow jacket. The sky is a clear, pale blue. Overlaid on the image is large, bold, white text that reads: "A PLACE FOR NEW IDEAS, GOOD STUDIES, AND BUSINESS IN SILICON VALLEY."

**A PLACE FOR NEW IDEAS, GOOD
STUDIES, AND BUSINESS IN SILICON
VALLEY.**

STANFORD UNIVERSITY IS A PRIVATE SCHOOL. IT IS FOR RESEARCH. IT IS IN STANFORD, CALIFORNIA. THE FULL NAME IS LELAND STANFORD JUNIOR UNIVERSITY. IT IS ALWAYS ONE OF THE TOP 5 SCHOOLS IN THE WORLD. STANFORD MAKES MANY NEW IDEAS. IT HELPS THE WORLD ECONOMY. IT IS IN A VERY GOOD PLACE: SILICON VALLEY. THIS MAKES A STRONG LINK BETWEEN SCIENCE AND BUSINESS. THIS PRESENTATION WILL SHOW ITS HISTORY AND HOW IT WORKS.

A MEMORY BECOMES A FUTURE: STARTED IN 1885

Leland Stanford (a rich man and former Senator) and his wife Jane Stanford started the school in 1885. Their only son died when he was 15. The parents wanted to help many children in California. They built the school for his memory.

The main goal of Stanford is to "help people and society." This idea made the school very open to new kinds of studies. It also made the school care about real-world problems. The school started teaching in 1891. It still works to be new and responsible today.

**SEVEN
GOOD
SCHOOLS
AND TOP
QUALITY**

Stanford has seven schools. Three schools are for all students. Four schools are only for higher-level students (Masters, PhD). Some important schools are:

1. Engineering School: It is always number 1 or 2 in the world. It works with many tech companies.
2. Graduate School of Business (GSB): It is one of the best schools for business studies.
3. School of Humanities and Sciences: This is the biggest school. It gives a lot of different knowledge.

It is very hard to study at Stanford. Only about 4% of students get in. This shows that the students are very good. The school has many teachers for few students. This helps students learn better.

STANFORD MAKES SILICON VALLEY MOVE

Stanford University helps Silicon Valley grow a lot. This is because teachers and students from Stanford use school research to start companies.

01

Students from Stanford started big companies. Examples are Google, HP, Cisco, Yahoo!, and Netflix.

02

The companies started by Stanford people make trillions of dollars every year. They give over 4 million jobs to people around the world.

03

Stanford gets many patents for new ideas. The school helps turn school ideas into real things we use.

"THE FARM": LIVING AND WORKING TOGETHER

The Stanford campus is called "The Farm." It is very big (about 33 sq. km). The buildings look like Spanish houses. The weather is sunny and nice.

01

Almost 97% of young students live on campus. This helps them become good friends and work together all the time.

02

There are more than 600 student groups. You can find a club for everything you like to do.

03

The campus has two important art museums. Art and culture are important here.

MONEY HELP: STUDY FOR FREE

Stanford is expensive. But it helps smart students with little money. It has a very good system to help students pay for school.

Main Rules:

1. If you are from the USA, the school does not look at your family's money when you apply.
2. Stanford promises to pay 100% of the money you need. They give money as a gift, not a loan.
3. If your family makes less than \$150,000 each year, you usually do not pay for classes. If they make less than \$65,000, the school also pays for your food and a place to live.

CONCLUSION: HOW STANFORD CHANGES THINGS

Stanford University is special. It mixes good studies with a strong business spirit. Students here must think hard. They must try new things. They must help solve world problems.

We can see its impact every day. We see it in the new companies. We see it in the new ideas that change our lives. Stanford will always be important for making the future. It teaches the next leaders of the world.
