

Best Offer For Investment Outsourcing In The Equity Market

"The sooner you start doing this (investing), the higher the end result will be. Compound interest will do the rest for you." @W. Buffett

How to make your money work for you?

Savings, insurance, pension, children's education

or just passive income from capital. How not to be left

as a fool at the end of your years with a "social pension" of 60 dollars?

All these questions were, are and will be relevant for a person

who cares about his future.

We will help you create an individual plan for capitalizing

your savings with one of the most effective and legal

ways to increase your savings. Without casinos, lotteries,

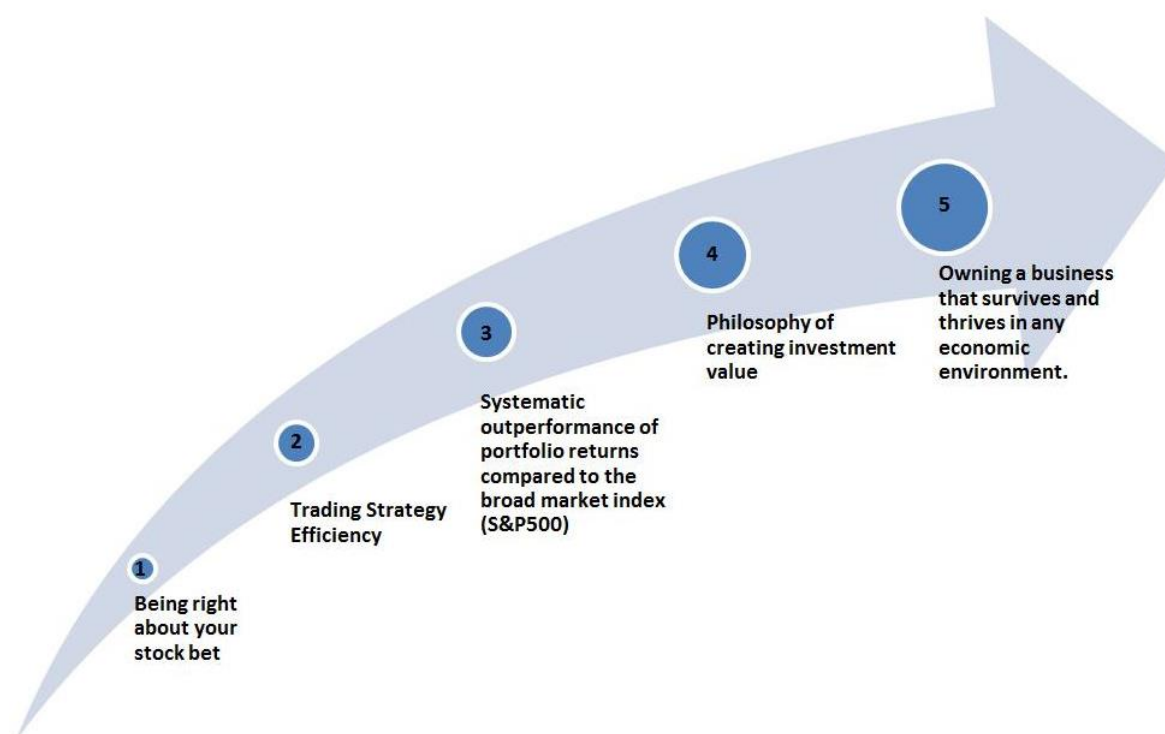

forex, crypto gambling and other newfangled entertainment.

Our investment strategy is based on the philosophy of a long-term value approach, where fundamental price-value differences are converted into value growth.

Only a professional approach. Long-term investment instruments of the US stock market.

We do not take money into management. Our clients with portfolios outsourced to us, manage their own funds. Our goal is to make every cent invested work effectively.

Stages of the evolution of investment philosophy

The performance of some of our clients' portfolios can be seen here (quarterly reports):

https://drive.google.com/file/d/1z_NZHWKFtj2UMLkRpxiCmJ3mLQbeEwun/view?usp=sharing

https://drive.google.com/file/d/1BqG8BIYEhd8RBWuWRe8dasTALNZKi_m8/view?usp=sharing

Note! The chart below compares the returns on typical investment vehicles with investing in a portfolio of securities over a 20-year period.

The returns are not guaranteed, but they demonstrate the predictable difference in the advantage of actively managing a concentrated portfolio of securities. Calculations are based on today's rates of return on (1) bank, deposit currency investments; (2) the yield on 10-year US Treasury bonds; (3) the market return of the Standard & Poor's 500 exchange-traded fund, as well as the current monetary policy of the Federal Reserve. 100% reinvestment of dividends.
