FULL-STACK DRUPAL DEVELOPER

SPORTS NEWS PORTAL: DRUPAL + ANGULAR INTEGRATION

Project Overview

Maintenance and enhancement of sports news platform built with decoupled Drupal 8.9 backend and Angular 14 frontend.

Technical Implementation:

Backend (Drupal 8.9):

- Module updates and security maintenance
- Custom views and fields implementation
- REST API endpoints optimization
- Server configuration and deployment
- Dev environment setup

Frontend (Angular 14):

- Styles modernization
- New components development
- API integration improvements
- Dynamic content rendering

DevOps:

- Development environment setup
- Deployment automation
- Server performance monitoring
- Git workflows optimization

Results:

- Improved site performance
- Enhanced content management
- Better user experience
- Streamlined deployment process
