

Control & Monitoring Instrumentation for Oil & Gas  
monitoring equipment for the oil industry

Request a Quote

Branom Instrument Co. is an industry leader in control and monitoring equipment for oil and gas applications. We know how crucial reliable, high precision process instrumentation is for oil and gas production, and we can help you find the right equipment for your specific application.

Ultrasonic Flow Meters & More from Top Manufacturers

Our huge, ready-to-ship inventory includes superior quality products from the world's foremost manufacturers. We offer a full line of gas analytics equipment, pressure gauges, pressure switches and pressure transmitters, temperature monitoring instrumentation, flow meters, level sensors, and more.

Startup, Calibration & Service

We offer complete programming and startup for new equipment, as needed. We can also provide service and onsite calibration for instrumentation already in the field. Our team of experts will help you get the most out of your control and monitoring devices.
