

Simply the Best
Software Development
Crafted In Central and
Eastern Europe,
The United States,
and South America.

DEVELOP•ROAM•EVOLVE

Over the last five years, Evolve Squads has been in the business of reverse engineering your entire outsourcing software development search cycle.

Our fulfillment process is more efficient and user-friendly so that hiring managers can focus significantly more on areas of the business where they can create greater value and return for themselves, and their stakeholders.

OUR VALUE PROPOSITIONS

Fulfillment Workflow Process

“Time kills all deals” ... especially for senior developers. Evolve Squads' unique value proposition utilizes our Fulfillment Workflow Process that puts our Fulfillment Officers in the center of the relationship between the developer and the hiring manager. This process creates a much quicker and more efficient interview, hiring, and on-boarding process than traditional outsourcing recruiting practices which usually takes anywhere between four to eight weeks to complete . . .

OUR VALUE PROPOSITIONS

Roaming Evolvers

Time zones, cultures, languages and skillsets are just some of the challenges hiring managers experience every day when dealing with globally distributed software development teams. By utilizing our fulfillment workflow process, our customers are able to take advantage of our vast network of senior-level developers, and at the same time mitigate the risks associated with team members located throughout the world.

OUR VALUE PROPOSITIONS

Dynamic Pricing Model

“How much do we owe?” Evolve Squads encourages three flexible dynamic pricing models all based on a time and material approach to software development. We understand each project is uniquely defined and may require distinctively different rates and pricing schedules.

These include the following:

- Hourly Rates
- Weekly Rates
- Monthly Rates

OUR VALUE PROPOSITIONS

Service Guarantee

We understand that bringing on the right developer can be a challenging and risky endeavor. We stand behind our work and want our clients to partner with us with confidence and assurance. As a result, if you are not completely satisfied with our developer, we will refund 100% of your invoice for the previous 30 days worked. Guaranteed.
