

# Zaluskii Vitalii

Junior Front-end Developer

21 y.o.

Hi! I'm Vitalii, and I'm 21 years old. My journey with computers began when I was 9 years old and got my first PC. From the age of 10 to 21, I've been deeply interested in computer technology and learning everything I could about it. In 2021, I enrolled at Lviv Polytechnic National University, when I started studying programming. I first saw the C programming language and later C++ at university in my first year of study. Then my first self experience was with Python and Java, but the technologies that resonated with me most were HTML, CSS, and JavaScript. Over the past four years, I've explored many new technologies and continue to learn and grow as a developer.
