

1 GOAL

The task was to develop content that not only attracted attention, but also aroused interest among the audience, including musical compositions, videos, stories and photographs from the life of a musician. Also, I created a musician's profile from scratch, developed a unique design and style, and also prepared information about his services and a price list.

2 RESULT

As a result of my work, a Ukrainian rap musician is successfully developing his blog thanks to attractive content. Conducted professional editing of videos and materials to present his work in the best possible way.
