## Skills

---

- Kotlin | Java
- Jetpack Compose | Retrofit | Hilt | Coroutines Flow | Room | CameraX | MVVM | Maps | Billing | Clean Arch | Firebase | JUnit | ExoPlayer | Media compressing | Glide | Picasso | RxJava
- Git | Ktor | WebSockets | Material Design | Google Play App Publishing | OAuth | CI/CD

## Experience (3+ years)

---

- [Carefully](#) (2+ years) – shared child-care app. Team of 2 Android developers
  - a. Refactored Java to Kotlin (+20% or 400+ more Kotlin files)
  - b. New screens and refactored screens are in Jetpack Compose (>45% screens are Composables)
  - c. Introduced tests to the project with coverage across the business-logic layer.
  - d. Implemented real-time chat with users and chat bots
  - e. Applied unified UI across new and refactored components of the app
  - f. Reduced build time by modularity and soft refactoring in such way, that more than 400 files added only ~10 seconds of build time
  - g. Accessibility features across the app*Jetpack Compose, JUnit, Hilt, Maps API (Compose + Views), Retrofit, MVVM*
- [Ajax Systems \(Cyber Security company\)](#) (offer) – got an offer after successful coding-challenge, but moved to Austria
- [Orbit Corporate](#) (0.5 year) - worked in a team with back-end and front-end developers to create a B2B Medicine app for Africa. Had challenging features to support:
  - a. QR-code scanner, that scans QR-s only in a specific location on the screen
  - b. Location-based business-logic to forbid users to do certain actions, when not in a desired place

## Education

---

- Computer Science | Bachelor 2023 - present  
*Technical University of Vienna*
- Computer Science | Bachelor 2020 - 2022  
*Petro Mohyla Black Sea National University*

## Other Projects

---

- [Echo Budget](#) : Budgeting app, that leverages the use of developer-written API to do calculations  
*Kotlin | MVI | Migration to KMP and Jetpack Compose | App Publishing*
- [Unsplash Photo Picker](#) : Android Library to pick photos from Unsplash  
Simple, yet beautiful implementation to use Unsplash API  
*Kotlin | Glide | ActivityContracts | Jitpack Export*
- [Shopfella](#) : Smart shopping list  
Freelance project built from the ground up and published to the Play Market  
*Kotlin | Coroutines | LiveData | ViewBinding | Billing | App Publishing | Firebase*
