

Bug report

Title: Click on the Preferences in Protection Monitor doesn't launch the Preferences

Summary: When clicking the Preferences in Protection Monitor application is opening but not the Preferences

Steps to reproduce:

1. Click on the Protection Monitor in Menu.app
2. Find the gear icon with settings and click on it.
3. Click the Preferences in menu.

Expected result: The settings of CleanMyMac is opening, when clicking on the appropriate button.

Actual result: CleanMyMac app is opening without Preferences.

Software environment: macOS Catalina version 10.15.7
