- Kyiv, Ukraine

### Tech Skills

- C#
- ASP.NET MVC
- Docker
- HTML5/CSS3
- Responsive/Adaptive design
- GIT/GITHUB
- JavaScript
- React
- Webpack
- Rest API
- Node
- Unit Testing
- MongoDB

### Soft Skills

- Communicative
- Open-minded
- Analytical thinking
- Problem-solving skills
- Eager to learn

### Languages

- English - Upper-Intermediate
- Ukrainian-Native

### Summary

I am a junior full stack developer with hands-on experience in C#, ASP.NET MVC, JavaScript, and modern front-end technologies like React. I build efficient, scalable web applications using clean architecture principles and RESTful APIs. I am a communicative and adaptable developer, always eager to embrace new challenges and find creative solutions, also passionate about development and constantly seek opportunities to expand my skill set. I am excited to bring my enthusiasm and problem-solving abilities to a role that values continuous improvement and offers opportunities for career advancement.

### Project Experience

#### TASTY TREATS GITHUB REPOSITORY

[PARCEL, JS, SASS, HANDLEBARS ]

A team project in which I participated as a developer. Made requests to the server and helped fix bugs and optimise work in team. Me with the team tried to find the most effective and optimised solutions to make the website suitable for all devices. This website serves as a platform for sharing and discovering recipes.

#### FLOWER STUDIO

[JS, CSS3, HTML5, VITE]

A team project in which I participated as a developer. A mobile-first approach was at the heart of the design process, guaranteeing that mobile users enjoy a fluid and delightful experience. Performed the hero section, and together with the team found the most effective solutions to optimise our work in team and make it productive. One of the standout features of this project is the captivating animation I created for the hero section, which welcomes visitors with a visually enticing and memorable introduction.

#### WEB STUDIO

[CSS3, HTML5]

A personal markup project. WebStudio is a fully adaptive website. I meticulously structured the codebase to guarantee fast loading times and smooth navigation. To achieve this adaptability, I leveraged my expertise in HTML and CSS, implementing responsive design principles to create a visually appealing and functional site. Educational project from GoIT courses.

#### DOMRIA API BOT

[C#, ASP.NET MVC, REST API]

An intelligent real estate bot built with ASP.NET MVC. DOMRIA API BOT searches rental listings by interacting with an external real estate API. I developed a custom RESTful API to handle user requests, process data, and deliver relevant results via an intuitive MVC-based structure. The project demonstrates my ability to integrate third-party services, structure backend logic clearly, and apply MVC principles to real-world applications. Educational/independent project.

### Education

#### IT School GoIT

Full Stack Developer | 2022-2023

**National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute", Bachelor's Degree**

Information systems and technologies | 2024-2028
