Hi, I am Mariia Svyst 

I am a graduate in Architecture and Civil Engineering with solid knowledge of building design and construction. I bring ideas to life through AutoCAD and 3ds Max, combining technical precision with creative vision. Passionate about smart construction details and modern door solutions.

introduction

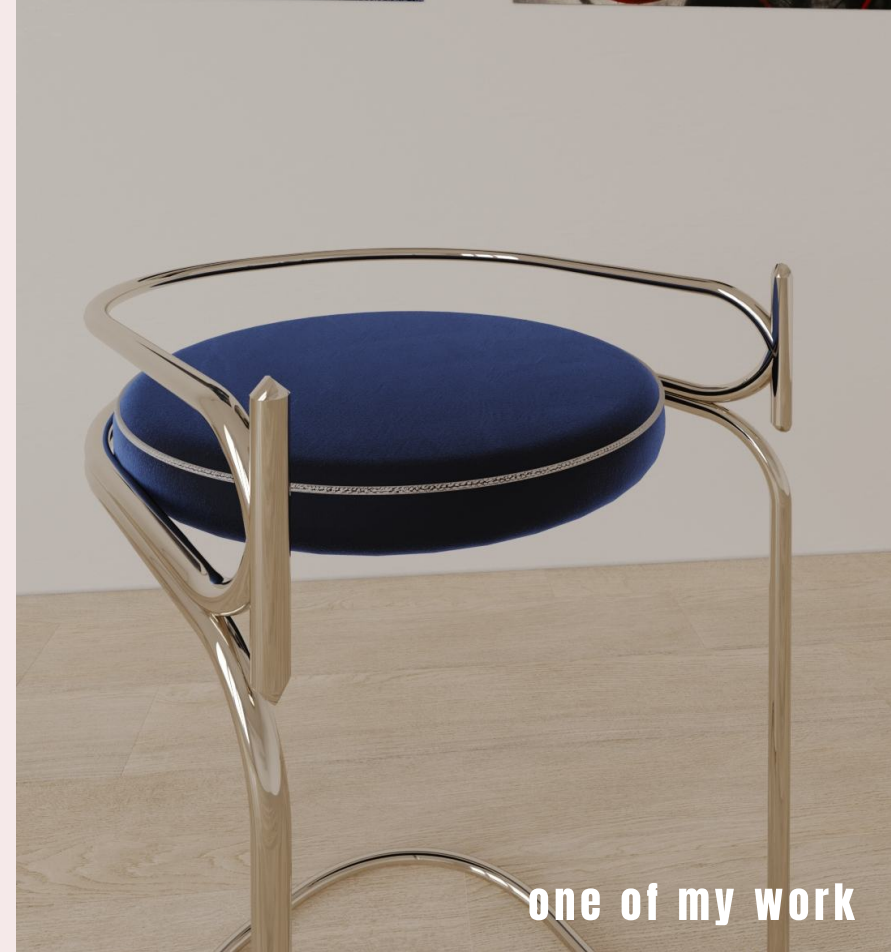

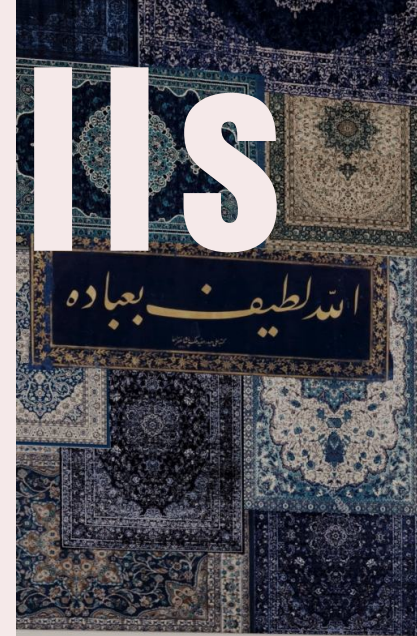

personal skills

Design & Visualization: Ability to create visual concepts, paying attention to color, texture, and materials.

Communication: Strong interpersonal skills, easily building connections with clients and colleagues.

Adaptability: Quick to learn new tools and adjust to new work environments.

one of my work

first project

A calm corner where light, texture, and silence meet. Minimal forms, soft contrasts, and a touch of green- a space that feels both modern and alive.

second project

A minimalist bedroom visualization. This visualization blends natural daylight with elegant LED accents to create a modern, photorealistic bedroom that feels both warm and sophisticated.

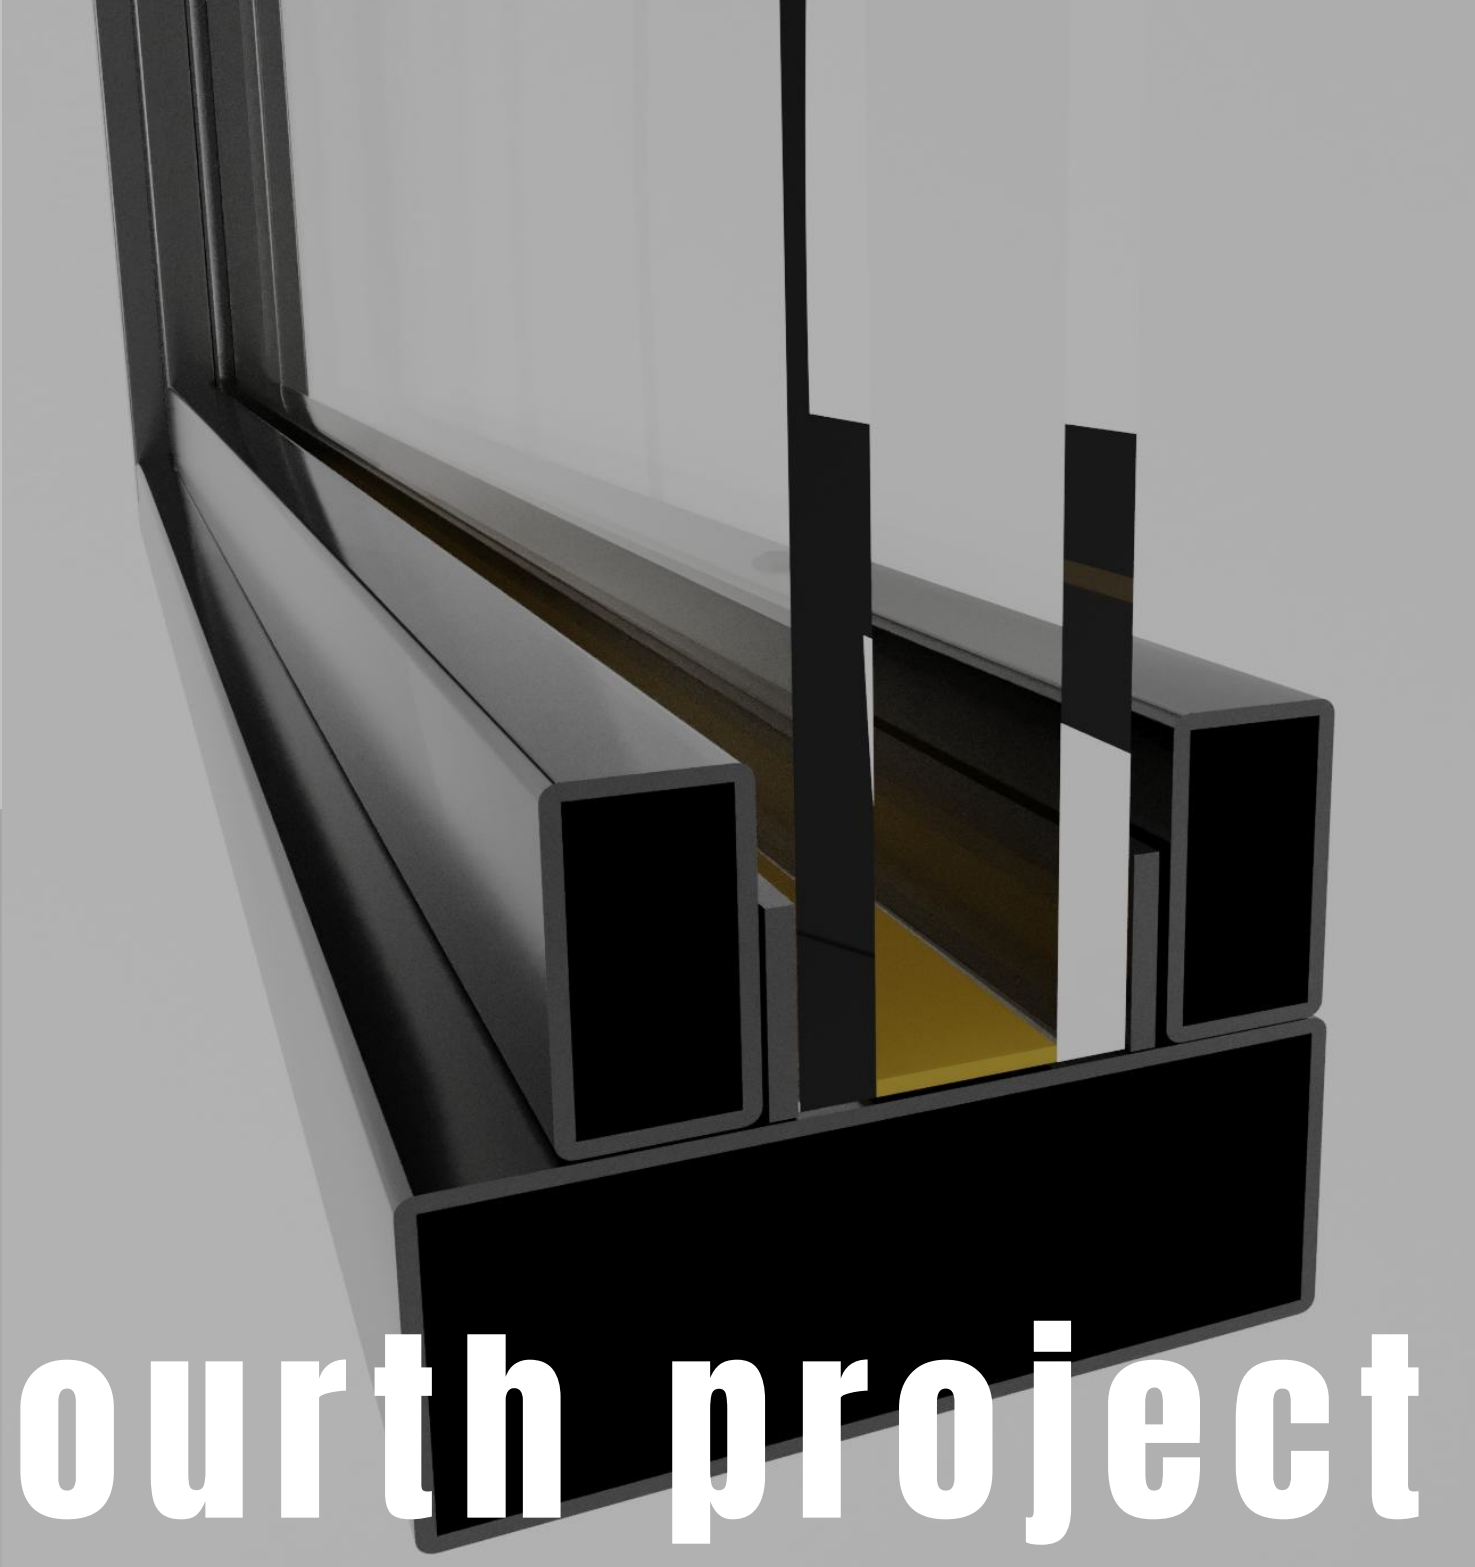

A stylish door collection created for Metallix — sleek steel frames with glass infill that combine transparency, durability, and modern design. Perfect as both functional partitions and statement interior accents.
